Teaching Methodology/Pedagogies Used: Lectures from speakers, Movie screening, PPT, projects, assignment and Test.

Modes of Assessment and Evaluation: Attendance/Assignments/Test.

Learning Outcomes of the course:

1. The objective is to provide an introduction to Language i.e. what is Language, Definition & different forms of language, Various theories of Origin of language, How language is different from sounds, Factors affect the Language
Change and Internal - external causes of Language Change
2. Introduction to major concepts of morphology and to discuss its place within linguistic theory.
3. Provide understanding that children acquire their mother tongue through interaction with their parents and the environment that surrounds them. Their need to communicate paves the way for language acquisition to take place.
4. Provide major concepts of the syntax that refers to grammar, while semantics refers to meaning. Syntax is the set of rules needed to ensure a sentence is grammatically correct; semantics is how one's lexicon, grammatical structure, tone, and other elements of a sentence coalesce to communicate its meaning.
5. Teaching Sanskrit through computational tools is an effective way due to which a language as difficult as Sanskrit would become relatively easy and more students would be able to learn it. Computational linguistics is defined as a combination of Computer Science and any language.
