SESSION	TITLE	THEME AND LEARNING OUTCOMES
Session 1	Introduction themselves to Financial Markets	Introducing financial markets involves grasping fundamental concepts like stocks, bonds, and commodities, and mastering skills in risk

		management to navigate the complexities of trading and investing.
Session 2	Online Trading/Demat and Depositories	Learning about online trading and demat (dematerialized) accounts, as well as depositories, aims to equip you with the ability to efficiently execute trades, manage securities digitally, and understand the role of depositories in facilitating smooth settlement processes in financial markets.
Session 3	Clearing, Trading and Settlement/Insurance	Learning about clearing, trading, and settlement processes in financial markets, as well as insurance, aims to provide you with the knowledge and skills to understand how trades are executed, risks are managed, and transactions are settled.
Session 4	Mutual Fund and Bond Market	Learning about mutual funds and the bond market aims to empower you with the knowledge to navigate investment options effectively. This includes understanding how mutual funds pool money from investors to invest in various securities, as well as comprehending the workings of the bond market, including bond types, yield dynamics, and risk factors.
Session 5	Introduction to derivatives, Futures and Options	Introduction to derivatives, futures, and options aims to provide you with a foundational understanding of these financial instruments. Learn how derivatives derive their value from underlying assets, how futures contracts enable parties to agree on future transactions at predetermined prices, and how options offer the right, but not the obligation, to buy or sell assets at specified prices. This knowledge equips you with tools for risk

		management, speculation, and portfolio diversification in financial markets.
